

Program Objectives

Upon completion of the Transcatheter Premie PDA Closure activity, participants will be able to:

- Review and learn incidence and prevalence of premie PDA
- Learn risks and benefits of surgical versus transcatheter device closure of premie PDA
- Discuss newer catheter based options for premie duct occlusion and optimal time of closure

Upon completion of the Pediatric Update activity, participants will be able to:

- Review current guidelines of Pediatric HTN, including managing pathways and newer treatment modalities.
- Describe three risk exposures and management strategies associated with the use of social media in healthcare, and identify reasons why sensitive data is at risk on mobile devices.
- Identify patients with Global Development Delay/ Intellectual Disability who should be offered genetic testing, understand the components of pre-test counseling, and identify red flags indicating the need for a specialist referral.
- Understand visual development and milestones in children, and implement techniques and guidelines for pediatric vision screening.
- Understand the epidemiology, trends, and effects on neurodevelopment regarding substance use, especially Marijuana, in teens; as well as, screening guidelines and counseling strategies for PCP.

Target Audience

Pediatric and Medicine Primary Care Physicians, Pediatric Specialists, Hurley Allied Health Professionals, and Residents.

Accreditation:

Hurley Medical Center is accredited by the Michigan State Medical Society to provide continuing medical education for physicians.
